

OUR PURPOSE

Making people's lives healthier, safer and more fulfilling

Ever since it was founded one hundred years ago—with the goal of mass-producing microscopes in Japan—Olympus has continued to make great contributions to society through its businesses. Throughout the years, our products and services have not only become essential parts of medicine and life sciences, but have also proved to be indispensable in the fields of manufacturing and infrastructural maintenance, as well as contributing to people worldwide by meeting societal demands.

We have been on a journey which will transform Olympus into a global medtech company. It is a huge step forward to a future where we can continue to help society progress.

We invite you to join us on our journey. Please look forward to Olympus delivering on its promises and soaring to new heights.
